

OPTICAL GEL GUIDELINE FOR MUD SWALLOWS

AFTER TREATMENT LAYOUT EXAMPLES

COMPLETED MUD SWALLOW NESTS ARE PROTECTED. CALL US. WE'LL HELP.

PRETREATMENT

1. Remove empty nests after Sept. 1.
2. Spray Dissolve-It on and 18" from nests to ground and let soak for 30 minutes.
3. Remove ALL traces of nesting on walls and ground then rinse.
4. Spray diluted bleach onto all pretreated areas.

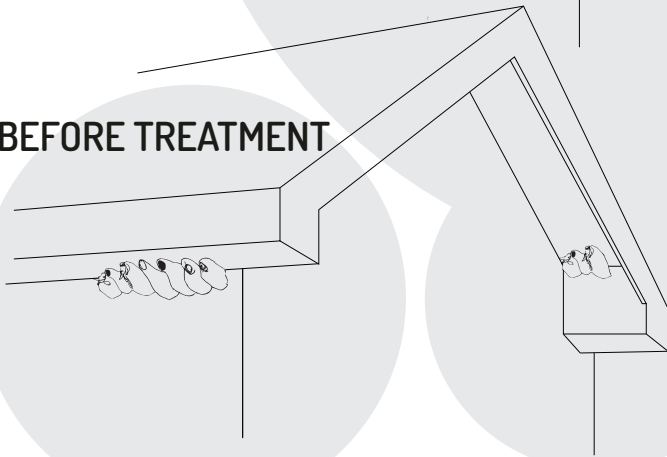

INSTALLING DISKS

- Diagram 1 - Closer corner example. Apply to corner with removable adhesive where nest was removed every 6" center-to-center as shown.
2. If closed corner nests were accompanied with open corner nests, follow Optical Gel pattern in two rows as indicated.
 3. In the following days, closely monitor the Optical Gel placement for returning mud swallows.
 4. Replace disks after September 1 when season officially ends to prepare for next season return.

NOTE

Treat returning swallow nests immediately before they are completed.
IF COMPLETED, CEASE ALL ABATEMENT UNTIL SEPT. 1.
